

Safety cabinets with wing doors PEGASUS

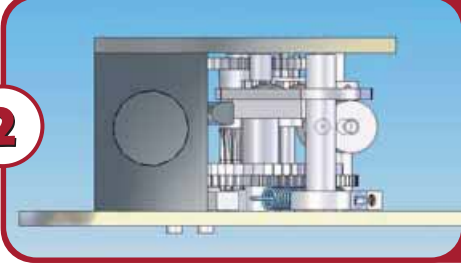

The Classic - with sophisticated new technology

Safety Cabinets with wing doors PEGASUS

Safety Features - **Easy to use!**

- 

1 **AGT - asynchronous coupled door opening mechanism**
Open two doors with only one grip of the hand.
Safe 60% work effort.
 Pull the handle of the right door and as if by magic the left door will follow automatically without being touched.
 Easy and safe operating of the cabinet, even while holding a container in your hand.
- 

2 **TSA - automatic door closing system**
High convenience and safety
 Containers were stored or removed? You can set your mind at rest and go back to your workplace, the cabinet will do the rest.
 After approx. 60 seconds the arrested doors will be released and will close completely on their own.
- 

3 **Door open arrest system**
Convenient and safe removal or storage of containers in the cabinet.
 Safety in the event of fire due to an integrated thermal release system, releasing the door at a defined temperature between 40 °C and 50 °C.
- 

4 **Locking mechanism**
Just integrate the cabinet into a master-key systems
 The cabinets are equipped with a cylinder lock and can be integrated into existing master-key systems.
- 

5 **Fully extractable drawers**
 Large storage capacity, optimal use of existing storage capacities, highest convenience when storing or removing bottles.
 Safety in the event of fire through automatic closing of drawers due to an integrated thermal release system.
- 

6 **Adjusting aids**
 Located at the bottom of the cabinet.
 Alignment of the cabinets from the inside without any additional installation effort.
