

Gas cylinder cabinets G90**Maximum safety in compliance with EN 14470-2**

Gas cylinder cabinets G90

Safety features in detail

1

Arm which locks in

Doors held open.

More safety and comfort when manoeuvring cylinders

The doors locks in place at 0° (also if it is not locked) by means of a c. piece - and can be locked in at 90°. With the maximum opening angle of 180° the interior of the cabinet is fully visible.

2

Interior height

Interior height: 1875 mm

Easy and convenient installation of gas fittings and pipes.

3

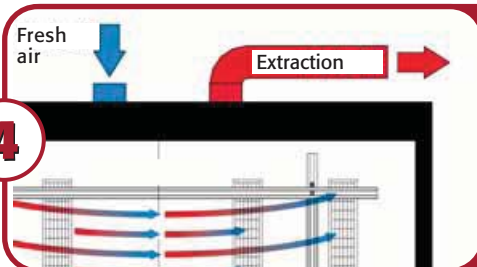

Locking mechanism

Just integrate the cabinet into a master-key systems

The cabinets are equipped with a cylinder lock and can be integrated into existing master-key systems.

4

Ventilation

Ingenious - safe - tested

The ventilation system guarantees complete and constant ventilation of cabinet interior from floor to ceiling. The pressure drop in all models is below 150 Pa. Approved by an independent testing laboratory.

5

Fold-away ramp

Rigidly fixed in the cabinet, lightweight. Convenient and safe use with dampened folding down. Low rolling edge, high safety when manoeuvring cylinders into the cabinet.

6

Adjusting aids

Integrated at the bottom of the cabinet.

Alignment of the cabinets from the inside without any additional installation effort.
