

Underbench cabinets

The flexible - fits under your fume hood

Underbench cabinets

Detailed Description - **Maximum convenience for you!**

1

Fully extractable drawers

Comfort and safety when operating.

The drawers are smooth-running, remain open in every position and ensure simple and safe access to all containers stored.

In case of a fire the drawers close automatically by an integrated, thermal release system.

2

Second level drawer

A lot of space for small containers.

Perfect utilisation of the inside space when storing small containers. The second level drawer remains open in every position and is safely withdrawn into the cabinet by the large drawer.

3

Earthing wire

Safe decanting of hazardous material.

Drawers for waste containers are equipped with earthing wire and clamp as standard!

4

Base

So the cabinet perfectly fits underneath your fume hood.

The base made of plastic laminated sheet steel gives optimal height adaption of the cabinets underneath the fume hood.

5

Castors

Easy handling

Castors underneath the cabinet make it easy to pull out the cabinet from underneath the fume hood.

6

Wing doors

Convenience and safety when operating

The doors remain open in every position.

The opening angle 135° offers an entire visibility of the cabinet's interior.

In event of fire the doors close automatically due to a thermal release system (fusible link).
